# Brida Collection

by Grupa Studio

Brida represents the result of combining modern technology of processing wood and meticulous handcraftsmanship.

The collection consists of a chair with armrests and a chair without an armrest. Uniqueness of the series can be seen in the detail of a slantwise cut edge which moves through a continuous line which binds the armrest and the backrest.

BRIDA Chair

# Woodlock Chair

by Redesign Studio

This chair with or without armrests represents a rarely used construction principle of connecting the backrest and front leg with a transversal reinforcement. The chair has an extremely compacted and fluid shape, and the intertwining of “locked” girders gives the chair a tremendous rigidity and surprisingly small weight. Woodlock chair is a technologically demanding solution made by the most advanced modern wood processing technology.

Woodlock Chair / Klin Table / Brida Chair

# Catapult Swing

by Miljana Nikolić

Catapult is a swing for indoor use with a seat and plywood girders intended for relaxation or active work in residential or business environment. Catapult swing is a blend of functionality and comfort, small enough for indoor use but also large enough to provide comfort; it allows the user to be active, but also rest and relax at the same time.

# Sofa

by Studio AUTORI

Sofa is piece of furniture designed special for GIR Store.  
It emphasizes the beauty and the process that wood has to go  
through till it makes it into the hands of customers.

# *Tables*

# Klin Table

by Numen / For use

Klin table system is inspired by the structure of rural agricultural tools of the Alps. Basic wooden profile is partially cut through the central axis which allows for the widening of smaller parts by using wedges. The result is a characteristic Y shape consisting of a unique base and two high-strung lateral forks.

Klin Round Table

# 202 Table

by Marko Oljača

Table 202 project is inspired by the structure of the Đavolja Varoš natural phenomenon and represents an interpretation of that structure. The bond between the legs and the table plate represents a stylization of the Palaeolithic phase in the genesis of Đavolja Varoš.

202 Table / Brida Chair

# Polytop Tables

by Redesign Studio

The collection of coffee tables typifies the ability of spatial positioning into compatible geometrical compositions. Simply joining two tables and aligning their base edges creates a desired appearance of the interior. Set of four coffee tables of different proportions varies from a wide and low with a hexagonal base to a tall and narrow with a triangle base.

Brida Chair / Polytop Tables with 3 and 5 legs

The collection of coffee tables typifies the ability of spatial positioning into compatible geometrical compositions. Simply joining two tables and aligning their base edges creates a desired appearance of the interior. Set of four coffee tables of different proportions varies from a wide and low with a hexagonal base to a tall and narrow with a triangle base.

Antipata Table / Opozit Wall Mirror

# Sinteza Table

by Redesign Studio

Sinteza table represents the stylization of new wood with the metal frame support. The item's construction creates a strong structure that holds the tabletop and, at the same time, creates a fruit bowl above the tabletop, where one can storage various other items such as cups or flowerpots.

# Trifora Side Table

by Đorđe Čukanović

This piece is made of ten identical elements which form a circle in order to make the pillar that serves as a support for a removable top plate. This type of construction allows for the combining of different materials and oak into one piece. Although the base elements are geometrically very straightforward, their production requires an excellent expertise in oak wood and a remarkable craftsmanship of processing material.

***Storage***

# Metal Frame Rack

by Studio AUTORI

Modular set of shelves, is intended to be the elements that are adaptable to different spaces and purposes. The base of these pieces is made of a light steel construction which is upgraded by different wooden elements such as shelves, lockers and drawers.

Brida Chair / 202 Table / Metal Frame Rack 2X

Metal Frame Rack 3X / Opozit Wall Mirror

# Totem Shelf

by Redesign Studio

Design of the shelf originates from the logic of packing construction elements by the smaller-into-bigger principle. This approach results in tilting the lateral sides and gradual shortening of the storage space. Assembling the shelf module upwards creates a harmonious stepped structure which has a suitable shape to be positioned by the wall or freely in space.

Totem Shelf / Sofa

***Lighting***

# XL Lamp

by Marko Oljača

This piece is inspired by the fact that an interaction represents a form of action in which two or more objects influence each other. The XL lamp gives a user the option of changing the shape of the object, which prompts an interaction between two objects.

# Kotlić Lamp

by Studio Presek

Kotlić lamp is a result of stylization of items from everyday use which have a tripod shape and which are a part of Serbian tradition and culture. This kind of shape is frequently represented in Serbian household items: footstools, hat stands, tripods which hold cooking pots etc.

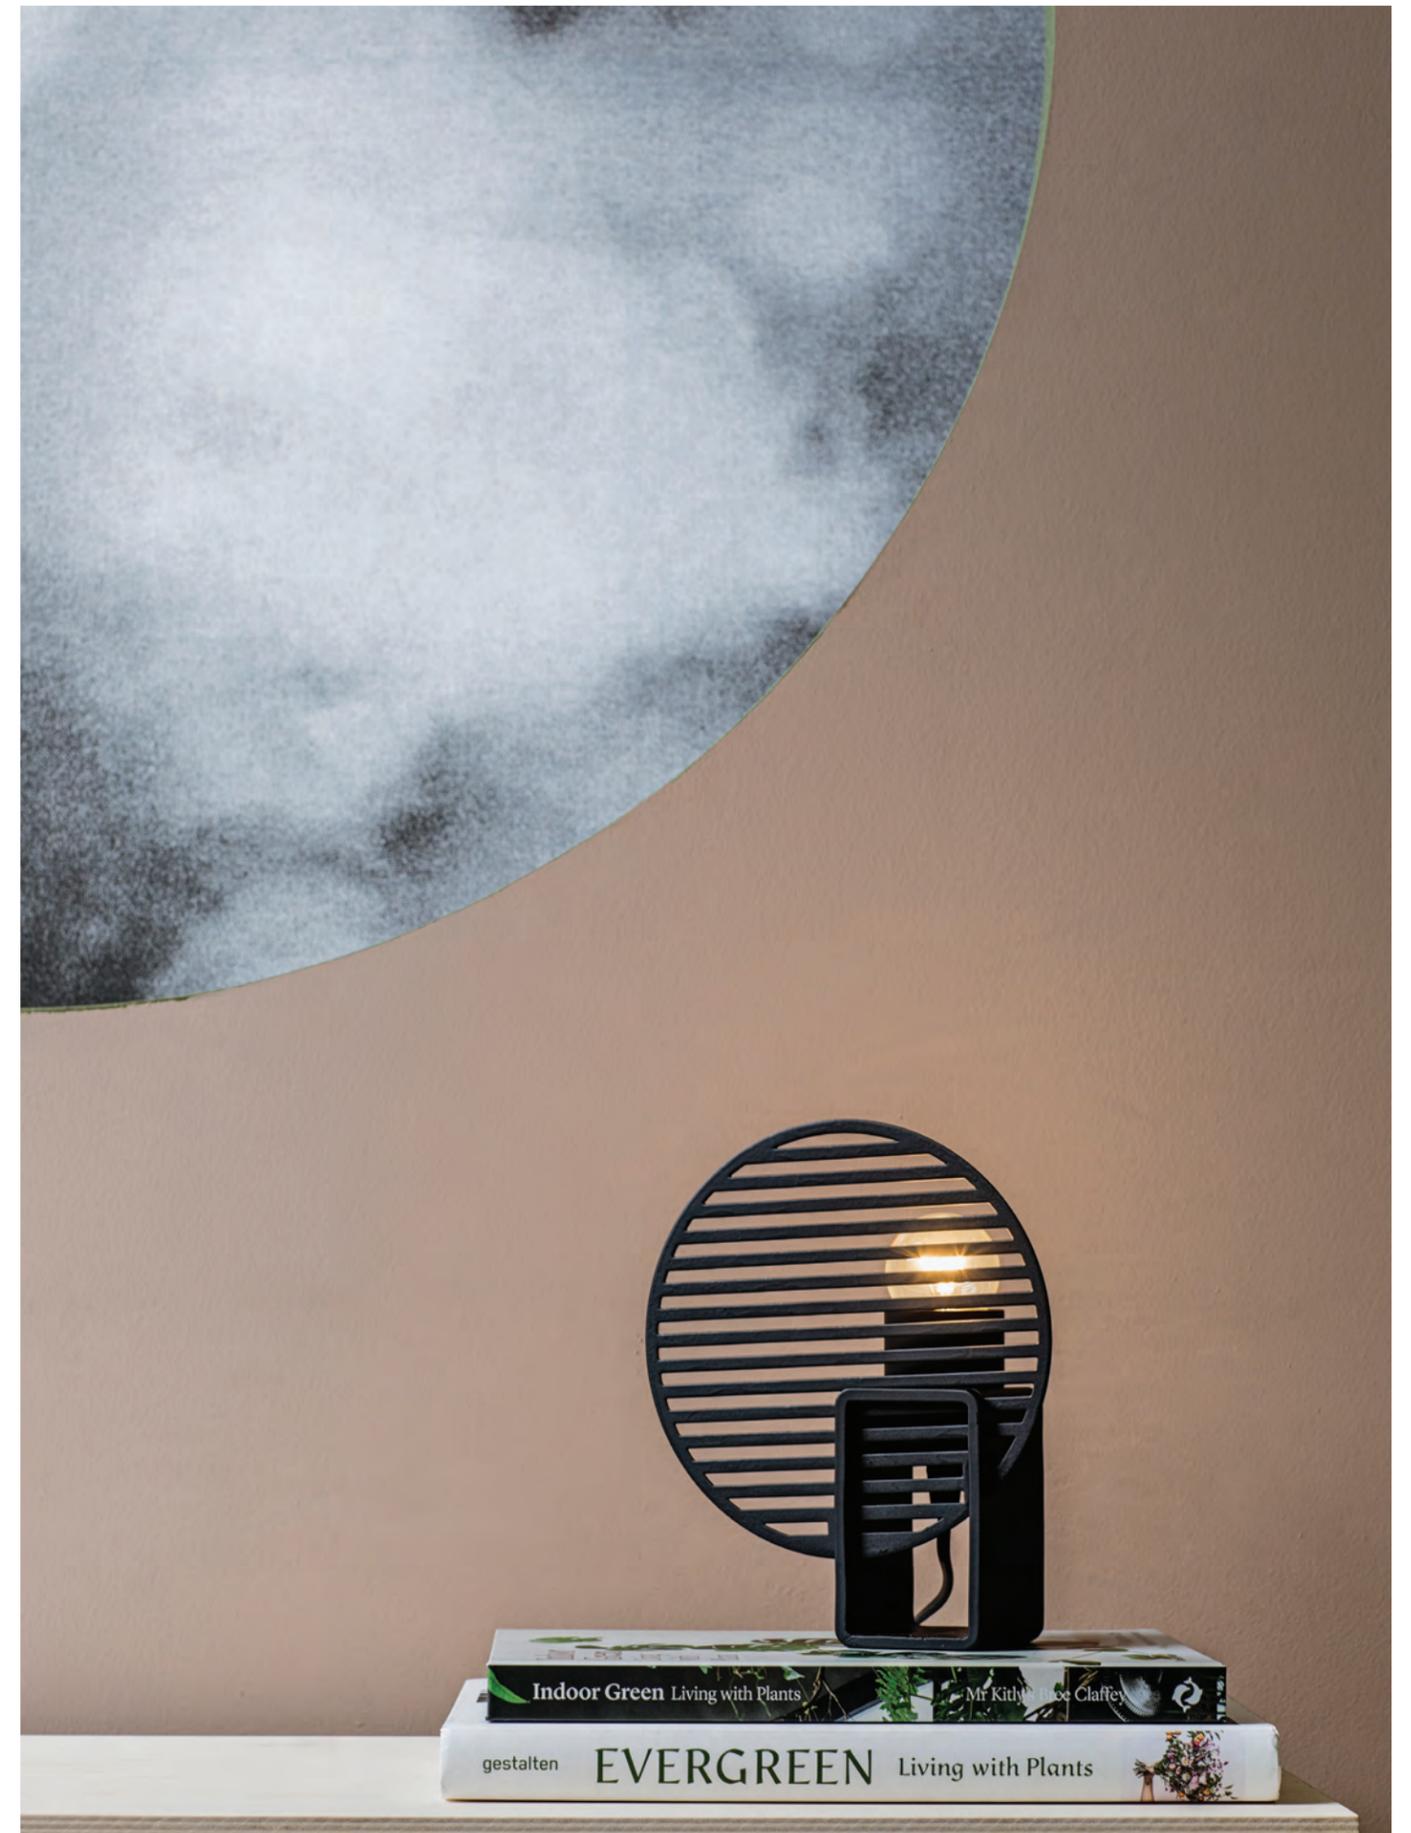

# Eclipse Lamp

by Studio Presek

Eclipse lamps are the stylizations of the solar eclipse. The bulb presents the Sun, and the panel presents the Moon.

They have removable decorative panels that give the lamps a strong ornamental light effects. Panels are available in black & white steel and nature wood, they come in transparent or flat nontransparent versions.

# ***Accessories***

# Oblo Coat Hanger

by La Mamba Studio

Oblo coat hanger comes in two sizes. Made in ash wood and designed for collective and residential spaces.

In a fruitful effort to blend simplicity with formality we have chosen ash wood as the only material that give shape to this hanger. Versatile finishing with high-end durable material, allow Oblo coat hanger to perfectly fit into our customer needs.

# Pendulum Mirror

by La Mamba Studio

The mirror collection is inspired by the pendulum and its movement, which made us consider an object that can be close and far away. We decided to apply this concept to an everyday object - a mirror, as it seemed like a fun way to move closer or further away from it. The marble base provides stability while a small, elegant handle acts as a tool to zoom in.

# Opozit Wall Mirror

by Numen / For use

This item has a clean and minimalist form and represents a balance between aesthetics and functionality, line and surface, the full and the empty. Opozit is consisted of a steel pipe that forms an O construction and which is filled with circle mirror. The mirror is adaptable to every type of space, public or private, and offers the option for storing accessories.
